## FITTING INSTRUCTIONS

A proper fit is integral to a helmet's performance. Please read the following instructions to be sure your X2E+ is fitted properly. Go to [Xenith.com/fit](https://www.xenith.com/fit) to view our fitting instruction video for additional help.

### X2E+ VARSITY SUGGESTED SIZING GUIDE

X2E+ VARSITY	SMALL				MEDIUM				LARGE				EXTRA LARGE			
HAT SIZE	6%	6½	6%	6%	6%	7	7%	7¼	7%	7½	7%	7¾	7%	7%	8	
CM	51	52	53	54	55	56	57	58	59	60	61	62	63	64		
INCHES	20		21			22		23			24		25			

#### STEP 1 MEASURE YOUR HEAD

Using a standard measuring tape, measure the circumference of your head an inch above your eyebrows. Then consult the size guide above and choose your correct X2E+ helmet.

#### STEP 2 PROPER SETUP

Unbuckle all four snap buckles and feed the chinstraps through the first slots of the snap buckles only. This will make it easier to adjust the chinstraps during fitting.

#### STEP 3 SEAT THE HELMET ON YOUR HEAD

Ensure the helmet is seated properly on your head. The front edge of the helmet should rest just above your brow and not be rotated excessively forward or backward. If you are between sizes, choose the larger size and insert thicker comfort pads.

#### CROWN COMFORT INSERT

If the helmet is resting higher than desired, remove the crown comfort insert located underneath the comfort pads in the top of the helmet.

#### STEP 4 CINCH THE LOW STRAPS

Pull the low chinstraps outward, which will cause the chin cup to slide up to meet your chin and Shock Bonnet to snug down around your head. Be sure to pull evenly on both sides so that the chin cup stays centered. Do not over-tighten as this may cause discomfort.

#### STEP 5 ADJUST LOW BUCKLES AND SECURE

Bring the low chinstraps under the jawline of the shell (as shown) and up to snap. Then slide each buckle along the chinstrap and snap into place, leaving minimal slack in the chinstrap.

## FITTING INSTRUCTIONS

**STEP 6** ADJUST HIGH BUCKLES AND SECURE  
Pull the high chinstraps upwards so that the chin cup pivots under your chin. Slide the buckles down along each chinstrap and snap into place, leaving minimal slack in the chinstrap.

**STEP 7** CHECK FOR PROPER FIT

With all four buckles snapped into place, apply force to the facemask in multiple directions. If there is excessive movement, tighten the chinstraps further and readjust the buckles. If the chin cup slides off the chin, unbuckle the high straps and adjust.

**STEP 8** LOCK BUCKLES IN PLACE  
Once you have tightened all four straps and the helmet feels secure, lock the buckles into place by feeding the end of the chinstrap through the second slot of each buckle.

## CONGRATULATIONS

The fitting process is complete. However, a properly fitted helmet is only the first part of safer play. Please visit [Xenith.com](http://Xenith.com) to learn more about concussion risks, the risks of using your head to make contact and strategies for reducing these risks.
